

Cottonwood Creek Elementary

Mat-Su Rain Gardens

**Constructed:
May 2009**

750 sq. ft. (25' x 30') rain garden provides drainage and filtering services for a 65,000 sq. ft. impervious runoff area creating by the parking lot and roof.

Students had a math lesson with the rain garden by creating a grid layout for their planting.

The garden is thriving, the plants have grown large, and it is collecting stormwater runoff. The only things the garden needs are some weeding and additional mulch.

2011: Summer #3
