Loading MSB Imagery Services in ArcGIS Pro

- 1. Open an ArcGIS Pro project.
- 2. Click on the Ribbon > Insert > Add Item

Project	Мар	Insert	Analysis	View	Edit In	nagery Sł	nare					
New New Map + Layout	New • Report •	Dimport Conne Toolbo Project	t Map 🛛 🔁 A ections ד 🗐 T ox т	Add Folder Task *	Bright Map Notes	Dark Map Notes	Light Map Notes Layer	Paired Map Notes Templates	Pastel Map Notes	Red Green Map Notes	 ▲ ☆ Add ▼ ◆ New ▼ ▼ ☆ Import Styles 	Add Item +

3. Click on New ArcGIS Server

4. In the Add ArcGIS Server User Connection window, copy and paste in the following URL: https://maps.matsugov.us/imagery/rest/services and click OK. *If you are prompted to enter user name and password, simply close that window without entering credentials.*

Add ArcGIS Server Connection						
Server URL:	https://maps.matsugov.us/imagery/rest/services					
Authenticat	ion (Optional)					
User Name:						
Password:						
	Save Username / Password to Windows Credential Manager	_				
	○ Save Username / Password to connection file					
	OK Cance					

 In the Catalog > Favorites pane, you'll see the service listed. Choose to either add it to the current project (right click, Add To Project), and/or have it persist for all new projects (right click, Add To New Projects).

6. In the Catalog > Project pane, the Servers folder shows the new connection.

- 7. Select, drag, & drop your selected image mosaic to your project.
- 8. You can also add other data, like hillshades from the Elevation folder.
