

Mat-Su Fish & Wildlife Commission

Collaborating to benefit fish & wildlife in the Mat-Su & beyond...

March 2022

Overview

- Who is the MSB FWC?
- What do we do?
- Our priorities
- Why our work matters
- Moving forward

What is the MSB FWC?

- Started in 2007
- An 8-member MSB commission advocates for sound fish and wildlife management on behalf of MSB and its citizens
- Uses science & citizen input
- Provides local expertise to the MSB Assembly, citizens, regulators

What's at stake in our fisheries work?

- ▶ The Mat-Su has been famous for its King and Coho Salmon runs...
- ▶ Fishing is important to us – sustenance for the soul and the body.

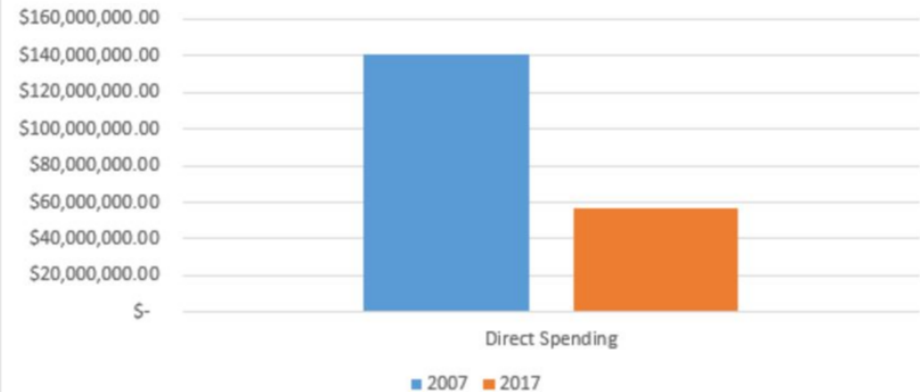

- ▶ Fishing provides significant economic contribution to the Mat-Su

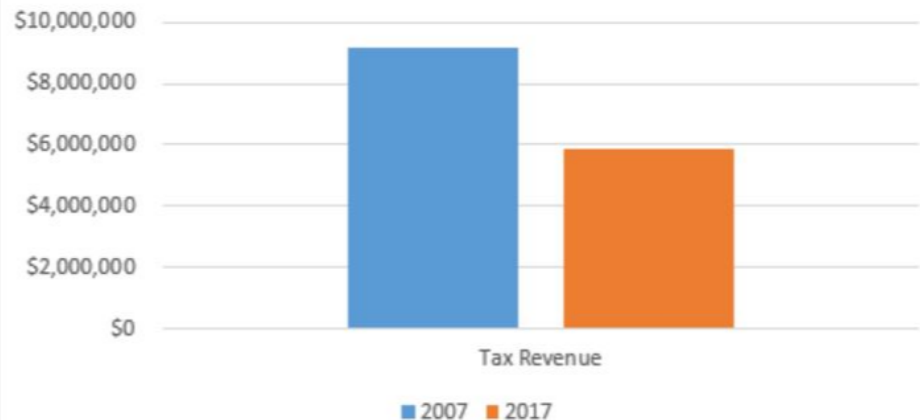

Economics of Sportfishing in MSB – it matters

- In 2017 direct spending on sport fishing in MSB totaled over \$57 million.
- Though still significant, this level of spending is down from 2007.
- How do we maintain the robust economic contributions of fisheries to the local economy?

Direct Spending in MSB Sportfishing decreased 59%,
2007-2017

Tax revenues tied to MSB sportfishing fell 36%,
2007-2017

Economic Contributions of Sportfishing on the Cook Inlet Region

The MSB investment in Fisheries: Fish Passage

- Since 2000, over \$20 million invested
- Over 100 fish passage culverts installed
- Restoration of 67 stream miles and 6,224 lake acres of anadromous fish habitat – we walk our talk!

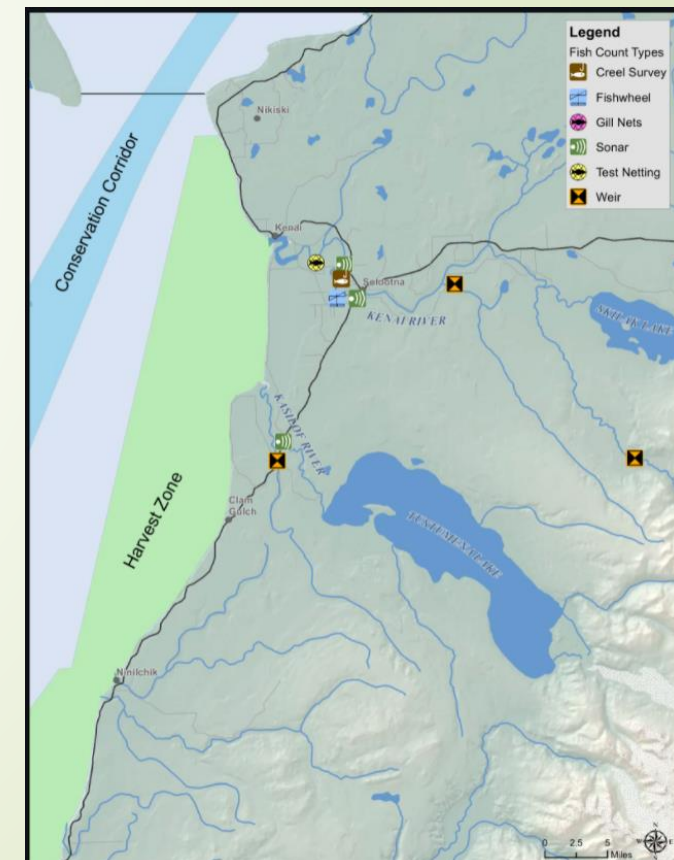

Fisheries Investments: Research & Mgmt.

- In 2014 the MSB received a \$2.5 million state legislative grant for fisheries work:
 - Fish passage culverts installed
 - Research gap analysis done
 - 13 research and management projects funded

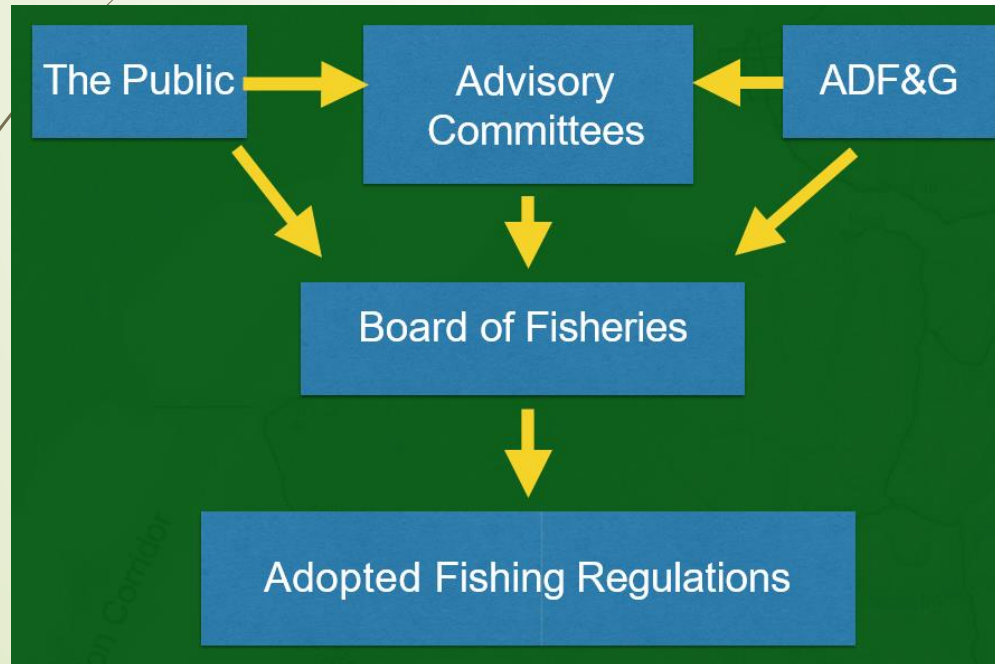

Alaska Board of Fisheries/Wildlife Work

- We engage in the BOF/BOG meetings to advocate for science-based management and regulation.

2020 BOF UCI Finfish Meeting: Feb. 7-19, Egan Center

- ▶ We worked collaboratively to advance science-based proposals that benefit fisheries conservation, traditions, and the public interest.

Looking for partners and allies

- ▶ We see common interests –
 - ▶ how can we best conserve our fish/wildlife resources?
 - ▶ How can we maintain and pass on our Alaskan fish and wildlife cultural traditions?
- ▶ We feel that finding partners and allies around common interests will benefit fisheries and wildlife in the MSB and Alaska, now and in the future.

How can we work together?

- By advocating for sound fisheries/wildlife management, all can benefit.
- Filling knowledge & management gaps:
 - Genetic fish stock analysis in Cook Inlet
 - Funding fishing weirs and sonar for better in-season management
 - Applying the successful model of commercial fishing from Bristol Bay in the complex mixed stock fishery of Cook Inlet

A better future together?

- Let's work together for the benefit of fish, wildlife, and each other.

Learn more

- We meet monthly except for the summer (gone fishing!)
- You can stay apprised of FWC activities:
